

A Sampling of Recent Dissertation Titles

- McClamroch, Krisiti. *Selecting treatment policies using decision analytic techniques: Applications to epidemiology* (Under the direction of Professor Frieda Behets)
- McGinn, Aileen. *Physical activity and the neighborhood environment* (Under the direction of Professor Kelly Evenson)
- Abrahamson, Page. *Recreational physical activity, body size, and breast cancer survival among young women* (Under the direction of Professor Marilie Gammon)
- Vaidean, Georgeta. *Spatial T wave axis deviation repeatability, descriptive epidemiology and association with incident coronary events* (Under the direction of Professor Gerardo Heiss)
- Messer, Lynne. *The neighborhood crime and deprivation environment and risk of preterm birth* (Under the direction of Professor Jay Kaufman)
- Williams, Rachel. *Irritable bowel syndrome among women with chronic pelvic pain: Characteristics, treatment, and post-operative outcomes* (Under the direction of Professor Katherine Hartmann)
- Rojas Martinez, Maria. *Lung function growth in children with long-term exposure to ozone in Mexico City* (Under the direction of Professor Dana Loomis)
- Keenan, Heather. *The epidemiology of traumatic brain injury in infants and young children* (Under the direction of Professor Steve Marshall)
- Nelson, Amy. *The plasmodium falciparum gene PFMDR1 and malaria drug-resistance in Southeast Asia* (Under the direction of Professor Steve Meshnick)
- Pence, Brian. *Identifying substance abuse and mental illness and assessing their impact on response to highly active antiretroviral therapy in HIV-positive patients* (Under the direction of Professor William Miller)
- Patnaik, Padmaja. *Reciprocal effects of Plasmodium falciparum malaria and HIV disease in a cohort of adults in Thyolo district, Malawi* (Under the direction of Professor William Miller)
- Sansbury, Leah. *Use of non-steroidal anti-inflammatory drugs, Cyclooxygenase-2 Val511Ala polymorphism, and association with colon cancer in a population-based study* (Under the direction of Professor Robert Millikan)
- Gilboa, Suzanne. *Seven county study of air quality and birth defects, Texas, 1997-2000* (Under the direction of Professor Andrew Olshan)
- Voetsch, Andrew. *The effect of alternative control selection schemes in analyses of the Foodnet salmonella case-control study* (Under the direction of Professor Charles Poole)
- Williamson, Dhelia. *Evaluation of serum immunoglobulin distributions in individuals living near six Superfund sites* (Under the direction of Professor Charles Poole)
- Purser, Jama. *Relationship between trajectories of leg strength and gait speed among sedentary older adults: Dose-response and influence of baseline comorbidity* (Under the direction of Professor Charles Poole)
- McNeill, Ann. *Metabolic syndrome and cardiovascular disease* (Under the direction of Professor Wayne Rosamond)
- Frost, Alexandra. *Selenium, colorectal adenomas, and colon cancer* (Under the direction of Professor Robert Sandler)
- Baccaglini, Lorena. *Epidemiology of Herpes Simplex Virus 1 and Helicobacter Pylori infection and coinfection* (Under the direction of Professor Victor Schoenbach)
- Koshiol, Jill. *Effect of smoking and human papillomavirus (HPV) type on time to clearance of HPV infection among HIV-seropositive and HIV-seronegative women* (Under the direction of Professor Jane Schroeder)

Napravnik, Sonia. *Antiretroviral therapy for human immunodeficiency virus infection in Puerto Rico, 1994 to 2000* (Under the direction of Professor James Thomas)

Shimokura, Gayle. *Association between infection control practices and transmission of Hepatitis C virus in the hemodialysis setting* (Under the direction of Professor David Weber)

Mirabelli, Maria. *Exposure to airborne emissions from confined swine feeding operations as a trigger of childhood respiratory symptoms* (Under the direction of Professor Steve Wing)
