

EPIDEMIOLOGIC & PUBLIC HEALTH CONSIDERATIONS OF SHALE GAS PRODUCTION: THE MISSING LINK

January 9, 2012 - 8:00 am - 4:30 pm (please arrive no later than 7:45 am)

Waterview Conference Center

1919 North Lynn St., Arlington, VA 22209, on the 23rd and 24th floors of the Corporate Executive Board building.

Ten minute walk from the historic Georgetown neighborhood of Washington, DC. For more information on the venue, including accommodations, directions, transportation, etc. please visit: www.executiveboard.com/waterview

Cost: \$75 - Includes catered breakfast, lunch, and coffee / snacks

Sponsors: Physicians Scientists & Engineers for Healthy Energy (PSE) and The Mid-Atlantic Center for Children's Health and the Environment (MACCHE)

Description: This conference will bring together experts from various research areas to address the public health aspects of unconventional natural gas drilling. The idea for this conference grew out of a suggestion by the NIEHS to investigate the methodological aspects of creating the pertinent epidemiological studies. Our overall objective is to create a research consortium that will aid in the collective design and implementation of both short term and long term health studies. The conference will address the complex methodological issues that make this such a challenging area of research, helping to coordinate studies that address industrial, geologic, toxicological, epidemiological, and health care factors.

Invite Information: If you have not received an invitation to this conference and would like to attend, please contact hays@psehealthyenergy.org
